Education

Oregon State University

Computer Science, focus in Web and Application Development
Coursework focusing on full stack web development and REST api frameworks.

Corvallis, OR

Expected December 2026

Grant High School

Demonstrated leadership as a varsity water polo player by supporting teammates, communicating effectively, and helping maintain a positive team environment.

Portland, OR

June 2020

Experience

Oregon State University

Student Technology Consultant

Provided friendly, customer-focused technical support to students, faculty, and staff by troubleshooting hardware, software, user account, printing, and network connectivity issues. Used ServiceNow to document, manage, and follow up on support requests while communicating technical information clearly and ensuring users felt supported throughout the resolution process. Supported Windows device deployment and configuration using Microsoft SCCM/MECM and PXE imaging, managed user and computer accounts through Active Directory, and assisted with software installation, system updates, permissions, and domain-related issues. Collaborated with IT team members to escalate complex problems and deliver timely, reliable technical solutions.

Corvallis, OR

March 2022 – July 2026

Oaks Park

Ride Operator

Provided friendly and professional service to guests by answering questions, giving directions, and helping create a safe and enjoyable park experience. Communicated company policies clearly and respectfully while handling concerns, resolving conflicts, and addressing rule violations. Worked with team members and supervisors to enforce safety procedures consistently while maintaining positive customer interactions.

Portland, OR

June 2021 – September 2021

Projects

DigiClips

Capstone

Developed new features for DigiClips' administrator web dashboard as part of a capstone project using the Angular framework. Focused on improving account management by creating a clear, user-friendly interface that made it easier for administrators to view, manage, and update user accounts. Collaborated with team members to design, test, and integrate features while following established project requirements and development practices.

September 2023 - June 2024
